Abstract of JP4005234

PURPOSE:To obtain the title tablets ensuring the development of caffeine whisker to be inhibited, by formulating a granular medicinal with powdery caffeine. CONSTITUTION:Firstly, a granular medicinal is prepared according to such a conventional technique that a medicinal except caffeine is homogeneously mixed with a shaping agent followed by grinding and adding a binder to the resulting powder followed by granulation and then drying. This granular medicinal is then incorporated with a lubricating gloss agent, disintegrating agent, powdery caffeine etc. followed by homogeneous mixing and then tableting according to a conventional means, thus providing the objective tablets.
